Wood and Stone Collection

BONOTTI Collezione Italia offers a selection of carefully chosen Italian Natural Stone, prepared for use in high level architectural elements and finishing, in those projects and design solutions where Natural Stone plays the leading role. Collezione Italia includes the best selection of marble extracted from the historic basin in the Apuan Alps, which provided the stone used for sculptures by famous artists like Michelangelo Buonarroti and in architecture for the construction of magnificent monuments such as Florence cathedral and the Leaning Tower of Pisa. Each type of marble is worked using age-old, Italian craft techniques, updated and supported by new, modern methods and high tech machinery.

BONOTTI Collezione Italia propone Pietre Naturali Italiane rigorosamente selezionate, preparate per essere utilizzate come pregiati elementi architettonici e di finitura, all'interno di progetti e soluzioni di design nei quali la Pietra Naturale diventa protagonista. La Collezione comprende la migliore selezione di marmi bianchi provenienti dallo storico bacino marmifero territoriale di Massa Carrara. Ogni marmo viene lavorato secondo le antiche tecniche artigianali, rinnovate e supportate dalle nuove metodologie offerte da macchine ad alta tecnologia.
